

Day 3 – Instructor Guide

Responsive Layouts with Flexbox & Bootstrap

Slide 1 – Welcome

What to Cover

Introduce the day's outcome. Show Google, Netflix, Amazon and LinkedIn and ask why they look good on every device.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 2 – Learning Objectives

What to Cover

Explain that today's session is 20% concepts and 80% coding. Students will build a responsive landing page.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 3 – Quick Recap

What to Cover

Conduct a rapid-fire recap. Ask Margin vs Padding, Box Model, Class vs ID, required attribute. Ask everyone to run yesterday's form.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 4 – Why Layout Matters

What to Cover

Discuss how layout affects usability. Compare desktop and mobile versions of familiar websites.

Interaction Ideas

- Ask students to predict before executing code.

- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 5 – Introduction to Flexbox

What to Cover

Live-code display:flex, justify-content, align-items, gap and flex-direction. Always ask students to predict the output before running.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 6 – Bootstrap Introduction

What to Cover

Explain why frameworks exist. Add Bootstrap CDN and demonstrate utility classes, buttons and spacing.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 7 – Bootstrap Grid

What to Cover

Explain the 12-column grid. Demonstrate col-12, col-6 and col-md-4. Resize browser frequently.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 8 – Bootstrap Components

What to Cover

Create a Hero section using Bootstrap cards, buttons, containers and rows. Explain reusable

components.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 9 – Hands-on Build

What to Cover

Students build Navigation, Hero and Feature Cards. Walk around, coach and avoid coding everything yourself.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 10 – Spot the Bugs

What to Cover

Show the broken webpage first. Let students identify issues visually before revealing HTML/CSS.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 11 – Build Sprint

What to Cover

30-minute build sprint. Students complete a responsive landing page with Navigation, Hero, Cards, Trainers and Contact sections.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 12 – Student Showcase

What to Cover

Invite 3–5 students. Ask: What did you build? Biggest challenge? How did you solve it? What did you learn?

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 13 – Quiz

What to Cover

Run a quick quiz on Flexbox and Bootstrap. Reward participation.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.

Slide 14 – Assignment & Preview

What to Cover

Assign Testimonials, Pricing, FAQ, Social Icons and Smooth Scrolling. Preview JavaScript.

Interaction Ideas

- Ask students to predict before executing code.
- Use pair discussions instead of open questions.
- Use hands-up polls.
- Walk around the classroom during coding.

Examples

Reference Google, Netflix, Amazon, LinkedIn, Chrome DevTools, Bootstrap documentation and live coding examples wherever relevant.
